Eintac Port Lockout Device

New from Total Lockout is this innovative multi-use, safety lockout device used for locking out electrical isolation port/socket on electric and hybrid vehicles.

Also known as the Manual Service Disconnect (MSD).

- Universal device fits all isolation ports
- Accepts any padlock up to 6.5mm dia shackle – PADLOCK NOT INCLUDED
- Can be fitted without the use of any tools.
- Device grips the side wall of the isolation port & locked in place with safety padlock.
- Device prevents workers fingers coming in to contact with live electrical terminals.
- Made from Glass Filled Acetyl

The purpose of removing is to protect the technician when carrying out certain tasks as well as protect the vehicle and vehicle ECU's etc.
