

Fork Lift Truck Fire Blanket

The most efficient way to isolate and extinguish vehicle fires, even in electric vehicles.

Vehicle Fire Blankets are designed to be quickly deployed over any vehicle fire.

The most efficient way to isolate and extinguish car fires, even in electric vehicles.

Any vehicle fire is dangerous and toxic. A fork lift truck fire in a warehouse can be a disaster. The Fork Lift Truck Fire Blanket enables you to contain the flames, smoke and toxic fumes in seconds – and extinguish it in minutes. It's the only solution that can effectively handle fires in electric vehicles.

The Fork Lift Truck Fire Blanket is an industrial commercial duty blanket. This lightweight blanket is designed to be deployed by any competent person(s) first on the scene of a vehicle fire. It can be used as a measure to contain the vehicle fire until emergency fire fighting services arrive on the scene.
